ISIN: KYG596691041
Ticker: 3690

Sector: Internet Software/Services
Stock exchange: SEHK
Market capitalization: 1554 billion

Key Metrics:

Performance YTD: 160.84%
Estimated 2020 P/E: 408

Earning per share: 0.44
Price to book: 15.16

Net Debt: -68 billion
Return on Equity: 0.037

Fundamental analysis summary

It is a Chinese company active in food delivery. It has an EV/EBITDA of 93 so is in my opinion overvalued. However, it has very little debt and could show strong growth if it decided to use leverage.

Technical analysis summary

The share price is growing rapidly. It has risen 160% since the beginning of 2020 and is at its ATH. With a market cap of USD 250 bn, it can be considered a mastodon.
